

Product specifications:

Description:

- Enables multi-session scenarios
- Multiple IR commands scenarios
- 360° infrared transmitters.
- External infrared receiver Input.
- External infrared transmitter output.
- LAN connection.

Infrared Frequency:	38-36KH
Wi-Fi Frequency:	2.4GHz 802.11b/g/n
Standby Current:	35ma
Input Voltage:	5v DC
Updates:	Firmware Over The Air (FOTA)
input Connections:	<ul style="list-style-type: none"> • External infrared receiver • External infrared sender • LAN Port • 5v DC input

Operating temperature: -10 degree to +50 degree

Operating frequency: 2400-2483 MHz

Transmission power: 0.04w

Transmission range: Up to 8 meters in optimal environment

Transmitting occupied bandwidth: 20 MHz

Modulation: DSSS, CKK, OFDM

Weight: 0.15 KG
